

ABS DoorJam

Fall Protection Anchor Door Frame | mobile

Convert your door frame into an anchor / single anchorage point

Our mobile, steel ABS DoorJam offers 2 individuals a secure anchorage solution for spontaneous work assignments. This securing device is simply clamped to the door frame using 2 clamping jaws. Use our ABS DoorJam for the best possible fall arrest protection during temporary work assignments (such as working at a window).

This temporary anchorage device is simply clamped to a door frame (max. width: 1100 mm) - no tools required. If you wish to secure 2 individuals, the frame width must not exceed 900 mm. Our doorjam is certified as a temporary system in accordance with EN 795, type B.

Round off your gear with matching **personal protection equipment** (PPE): We offer a complete range of high quality safety products with everything you need from lanyards to connectors and much more.

- EN 795:2012, B
- CEN/TS 16415:2013
- Simply clamp the device to a door frame
- Maximum door width: 1100mm (2 individuals: maximum 900mm)
