

# ABS-Lock V-B

Fall Protection Anchor Concrete | hammered in

## Fall arrest device – simply hammer it in

Our ABS-Lock V-B anchorage device is designed for 1 individual. This fall arrest device, which is equipped with a discreet anchor tab, is unobtrusive to the eye and does not spoil the architectural design of your building. Our compact anchor weighs just under 40g. It is supplied with corresponding drive-in dowels (M10) making it extremely easy to install in concrete. Simply hammer the dowel into a 80mm bore hold and tighten up the nut.

The anchorage device is tested to withstand axial and lateral loads. Our ABS-Lock V-B can also be easily installed in a ceiling. For steel structures: A **countered model** is also available.

- EN 795:2012, A
